

SENSES – SMELL

SMELL

Photographers can use their images to stimulate the "Olfactory Memory" (the recollection of odours) – Images of objects that have a distinctive smell cause your brain to think you can smell the object you are looking at.

These photographers have captured objects with distinctive smells.

YOUR TASK IS TO TAKE PHOTOGRAPHS OF OBJECTS THAT GIVE OFF A DISTINCTIVE, FAMILIAR SMELL. THE IMAGES CAN BE OF THE SUBJECTS BY THEMSELVES, OR YOU CAN INCLUDE PEOPLE IN THEM TOO. USE YOUR CAMERA/PHONE. (WHATEVER YOU HAVE ACCESS TO).

THESE SHOULD BE PRESENTED ON CANVA ALONGSIDE ANNOTATIONS WHICH EXPLAIN AND EXPLORE YOUR IDEAS. TO SUBMIT YOUR WORK YOU SHOULD SHARE THE DESIGN WITH HBOX@FULSTONMANOR.KENT.SCH.UK PLEASE LET ME KNOW IF YOU HAVE ANY ISSUES.

WE LOOK FORWARD TO RECEIVING YOUR SUBMISSIONS.
